DESCRIPTION

The FBT KEIRON 8C two-way speaker system features lightweight wooden construction with a scratch-resistant paint finish. Available in black or white, the FBT KEIRON 8C provides fixed installations with an elegant design suitable for a wide range of applications. Incorporating an 8" coaxial low-frequency woofer with a 2" voice coil and a 1" high-frequency driver with a 1.4" voice coil coupled to an 80° dispersion, the FBT KEIRON 8C delivers low-distortion audio with an SPL level that goes far beyond expectations for such a compact solution, with a frequency range of 60Hz to 20kHz. The FBT KEIRON 8C provides high-fidelity sound for both speech and music applications, with a maximum SPL of 125dB. Two fixing points positioned at the rear of the cabinet allow the use of a horizontally and vertically adjustable wall support (WM-68).
