Xtalk XPro

Boost Your Transmission Signal

Introducing the SYNCO Xtalk XPro wireless intercom system, an upgraded version of the X series.

Its external antennas enhance transmission signals, delivering a 500m range for a more reliable and enjoyable crew-talking experience.

Supporting up to 13-unit connections, the SYNCO group expansion technology enables division into multiple independent groups within one system.

With the intelligent 2.0 AEC algorithm and 3.5mm real-time monitoring, XPro offers a non-intrusive chat experience.

Moreover, its innovative boost mode allows seamless signal boosting without concerns of signal interruptions when passing through concrete walls, buildings, or during high-speed movements.
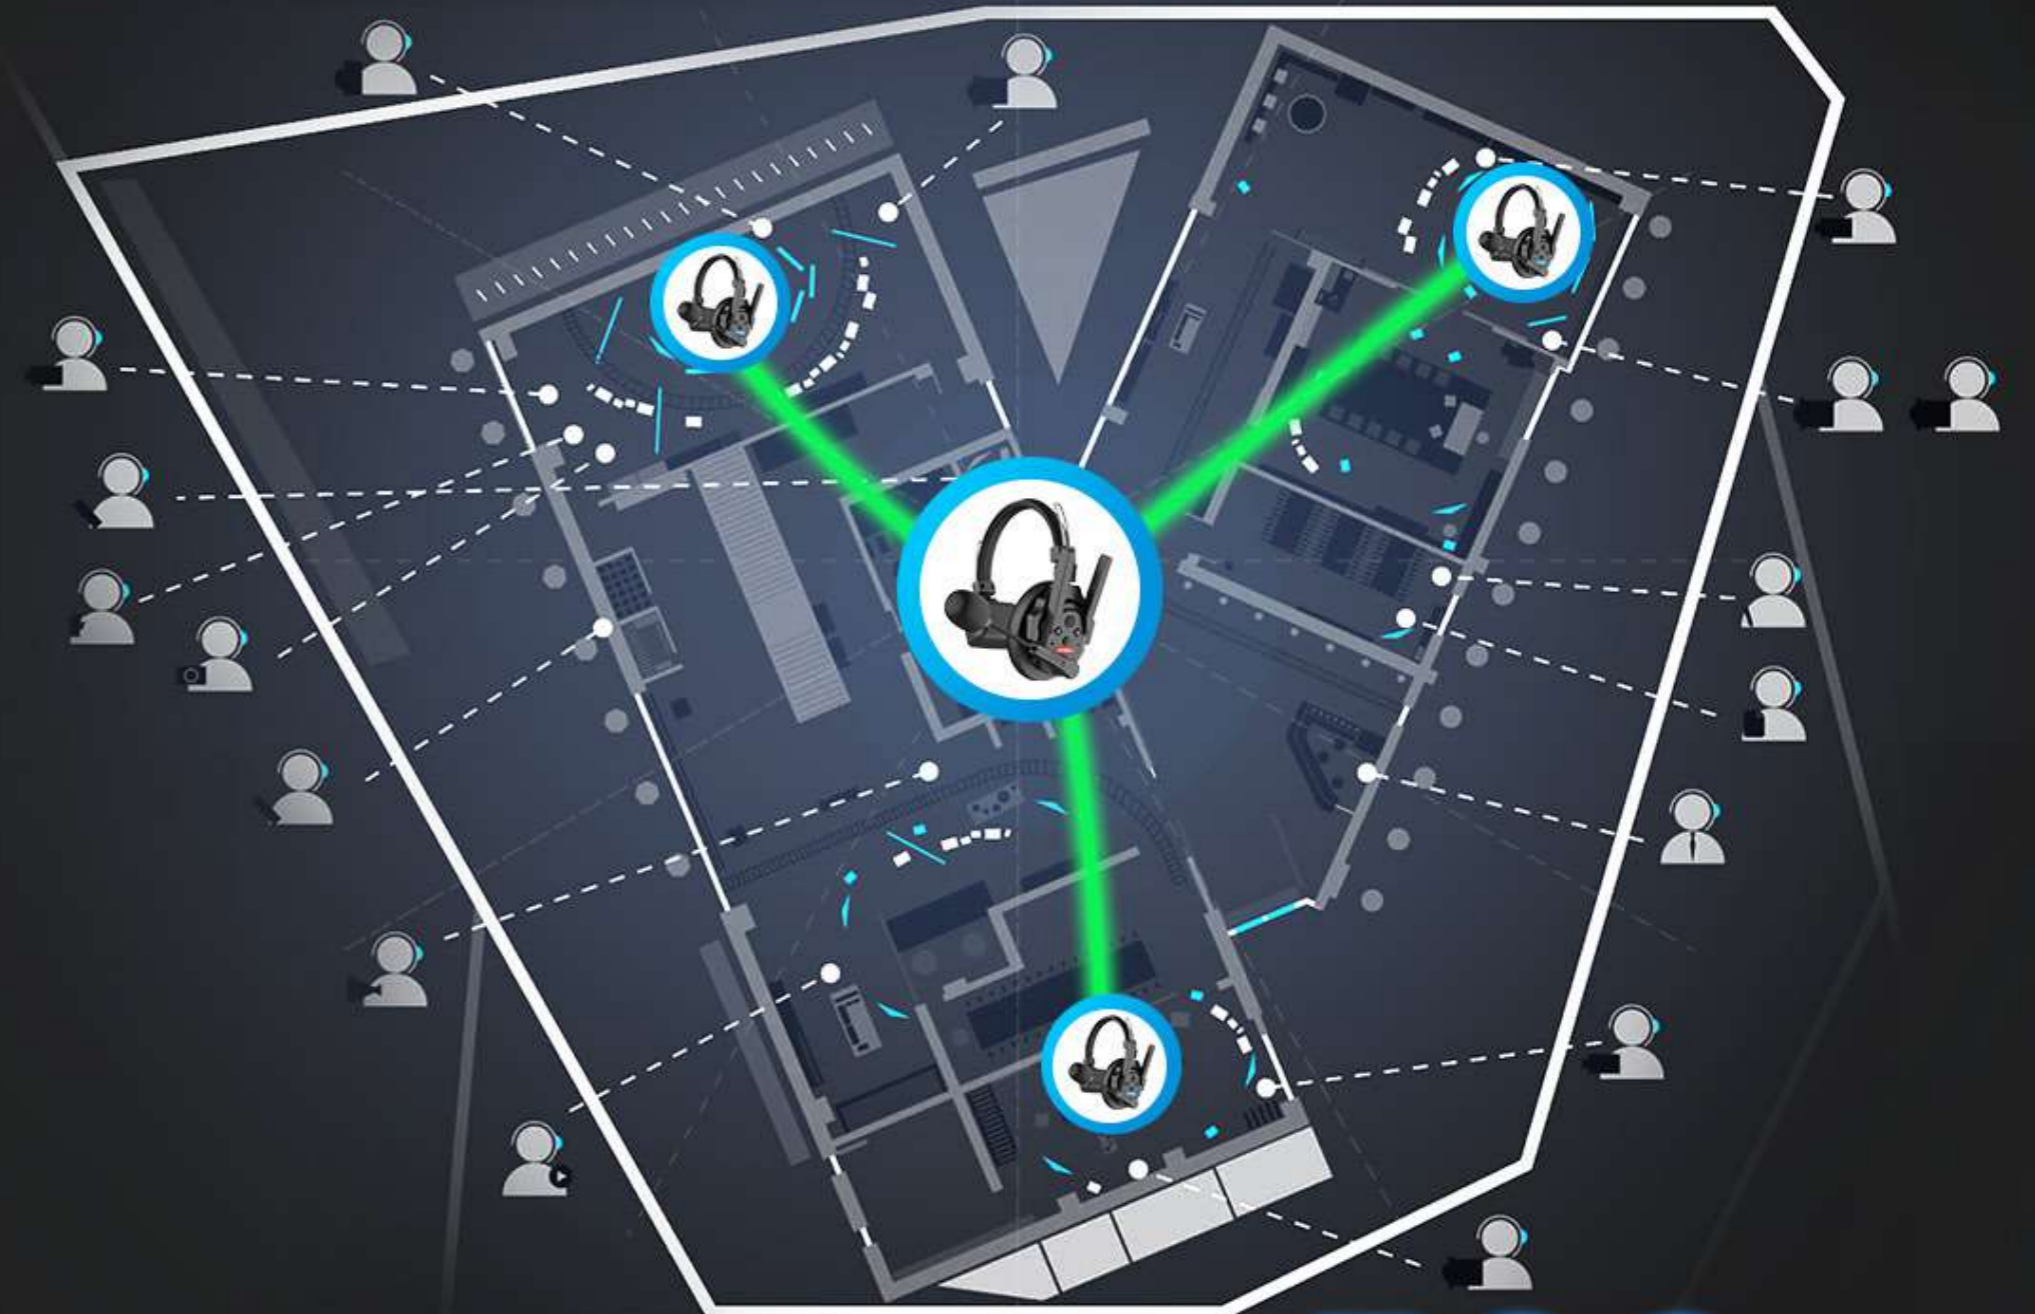

Expanded Team Communication to 500M Distance

2 high-gain external antennas greatly boost the transmission signal of XPro headsets, delivering a 500m reliable connection range between you and your crew.

Instant response backlink ensures there's no need for long-distance movement while waiting for the system to reconnect. Its strong anti-interference capability is ideal for complex and large events with large numbers of guests in the hundreds and thousands.

No matter film shooting, sportive live events, company holiday parties, industry conferences or professional seminars, we've got you cover!

SYNCO Quick Re-Link Tech
No Need To Walk Far To Re-Connect

500m

Experience-enhancing 2.0 AEC Spanning from 150HZ to 7KHZ

Xtalk XPro features advanced AEC technology, eliminating echoes, reverberation, and unnecessary ambient noise. Even in noisy environments, it ensures clear recognition of voices, guaranteeing precise and accurate conversations.

Elevate your communication to new heights with Xtalk XPro, activating noise reduction with just one click so that your team isn't disrupted by background noise anymore.

Supercharge the Signal with Boost Mode

The breakthrough feature by SYNCO called **Boost Mode** allows for intelligent spectrum switching at the click of a button.
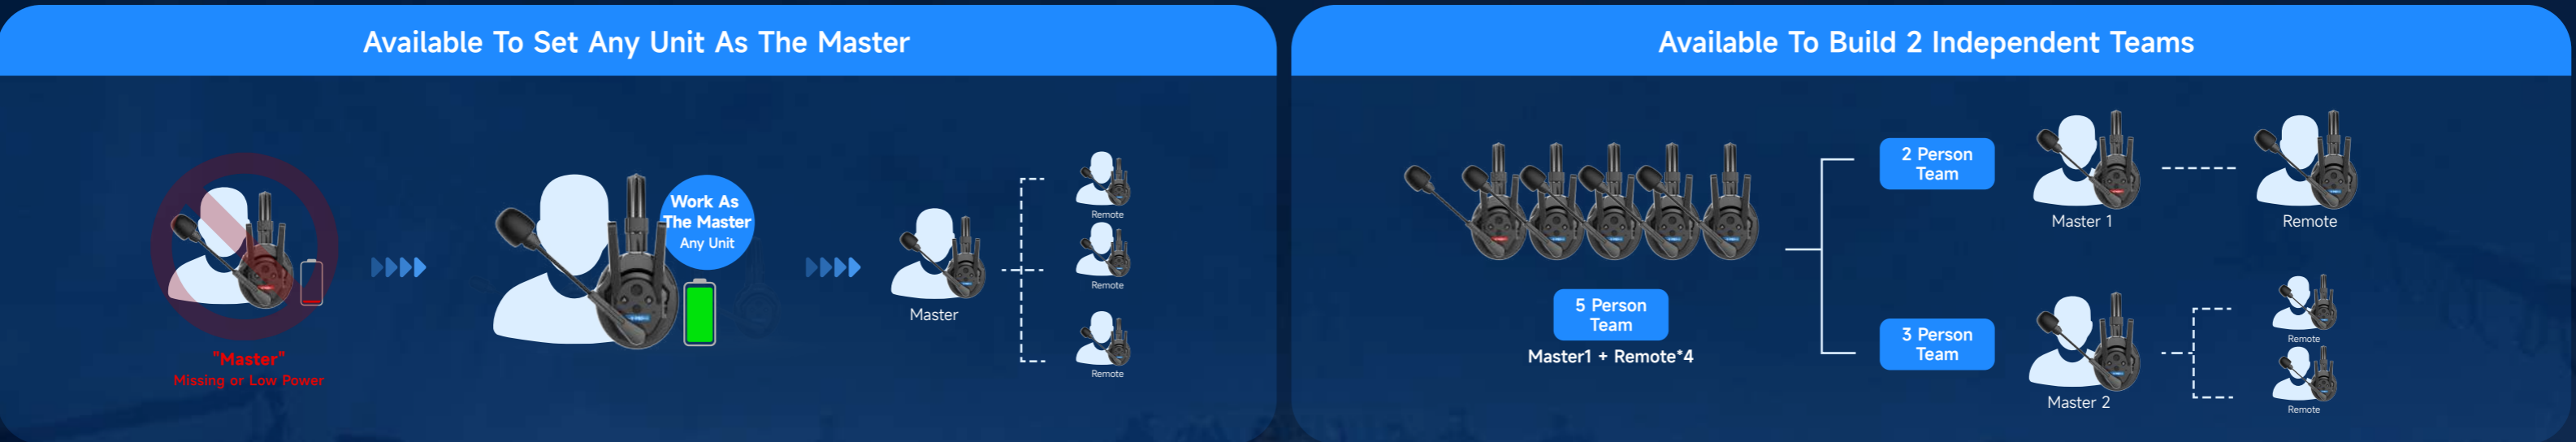

Signals are instantly multiplied, effectively enhancing communication quality with ease. Say goodbye to weak signals during **calls, through-wall communication issues, and complex signal interferences**—elevating team call quality to the next level.

Selectable Master For Communication Flexibility

Elevate group communication dynamics with SYNCO's groundbreaking MasterFree Algorithm, which allows the flexibility to designate any headset as the master device, ensuring uninterrupted sessions without battery concerns.

Assemble a group of 2 to 13 people for any conversation topic of your choice.

SmartFlow Sync with Unique 3.5mm Real-time Monitoring

Unleash the power of unique real-time monitoring and wired headset functionality in One! Seamlessly communicate with your team while monitoring audio from devices like cameras and recorders, and no need for another headset.

Perfect for field control personnel overcontroling the shooting process, catering to the needs of on-set commanders, directors, supervisors, and more.

Unique One-Button Remotes muting Function

The Dominant mode(Push to Mute) mirrors the "Mute All Remotes" feature in live-streaming sessions.

To enhance communication and professionalism, the Master now possesses a potent one-button control to mute all remotes instantly during disruptive conversations or disagreements, ensuring undivided attention on the Master's dialogue.

Connect All Day With Rechargeable And Replaceable Batteries

Low-power design and powered by rechargeable and replaceable batteries, Xtalk XPro ensures you to easily power up your headset for working over 24H, while the 1050mAh replaceable battery feature allows you to swap in a fully charged backup.

Stay connected and communicative throughout your day, confident in the reliability of the Xtalk XPro efficient battery system.

Optimized Portability And Durability For On-The-Go

Crafted from lightweight ABS materials and smooth leather, each headset of Xtalk XPro weighs just 194g with the battery included, ensuring comfort during extended use.

The upgraded over-ear leather cushion is designed to fit the ear, providing enhanced stability and comfort, making it ideal for challenging work environments.
